SUMMARY

Frontend Engineer with 4+ years building production **React** and **Next.js** applications across real estate, LMS, and media asset management domains. Proven track record of leading **SEO** and performance initiatives that directly improved business metrics — reducing load times, boosting search rankings, and scaling component architectures used across teams. Experienced in state management (Redux, Zustand, React Query), type-safe full-stack development (trPC, GraphQL), and cloud integration (**AWS**). Capable of contributing across the full stack when required.

EXPERIENCE

Senior Frontend Developer

Dwelleo

📅 01/2026 - Present 📍 Saudi Arabia , Remote

Real estate platform serving the Saudi market

- Architect and maintain a modular, reusable component library powering property listings, advanced search filters, and analytics dashboards.
- Led SEO and performance initiatives including server-side rendering (SSR), structured data, and Core Web Vitals optimization, resulting in a 50% increase in organic search traffic across 4+ key landing pages.
- Implemented Google Tag Manager (GTM) infrastructure for product analytics and conversion tracking, enabling data-driven decisions on user funnels and listing engagement.

Senior Frontend Developer

Sayan

📅 08/2025 - 12/2025 📍 Saudi Arabia, Remote

Learning Management System (LMS) for digital course creators

- Delivered core features for a remote-first LMS platform enabling creators to monetize digital courses, focusing on scalable course delivery flows and user onboarding.
- Built and optimized reusable UI components for course authoring, student dashboards, and payment/checkout flows, improving consistency across the platform.
- Contributed to performance optimization and responsive design, ensuring a seamless experience across desktop and mobile for both creators and learners.

Software Engineer

NexSpec LLC

📅 11/2024 - 07/2025 📍 United States, Remote

Asset and media management solutions for creative agencies

- Partnered with the engineering team to enhance NexSpec's asset management product, shipping features that improved system performance and user workflow efficiency.
- Integrated AWS services (S3, Lambda, CloudFront) for scalable cloud storage, secure file handling, and efficient media processing of large creative assets.
- Contributed to frontend architecture decisions and code quality standards, including code reviews and component design patterns for maintainability.

Frontend Developer

Aqarmap

📅 08/2023 - 10/2024 📍 Egypt, Hybrid

Leading real estate marketplace in Egypt

- Built and shipped features across React and Next.js applications for a high-traffic real estate marketplace serving 1M+ monthly users.
- Drove SEO strategy implementation — SSR, structured data, dynamic sitemaps, and metadata optimization — resulting in 70% improvement in search engine visibility and organic rankings for property listing pages.
- Led performance optimization efforts validated via Google PageSpeed, reducing LCP from 4.5s to 2.5s and improving Core Web Vitals scores from 58 to 92.
- Partnered with backend teams on microservices integration and built interactive data visualizations using Chart.js for property market insights and pricing trends.
- Contributed to component library standardization and code review practices, improving code consistency across the frontend team.

SKILLS

Languages & Core:

TypeScript, JavaScript, HTML5, CSS3

Frontend Frameworks & Libraries:

React, Next.js, React Native

State Management & Data Fetching:

Redux, Redux Toolkit, React Query (TanStack Query), Zustand

Styling & UI:

TailwindCSS, Material UI, Responsive & mobile-first design

Practices & Methodologies:

SEO Optimization, Server-Side Rendering (SSR), Performance Optimization, SOLID Principles

Testing, DevOps & Tools:

Playwright, Docker, Git

Backend & APIs:

Node.js, NestJS, REST APIs, GraphQL, Prisma

SELECTED TECHNICAL HIGHLIGHTS

SEO & Performance Overhaul – Aqarmap

- Led end-to-end SEO and performance optimization of the core property listing platform, implementing SSR, structured data, and dynamic sitemaps. Reduced LCP from 4.5s to 2.5s and improved organic search traffic by 70%

Full-Stack Type-Safe Application – Personal Project

- Architected a Twitter-style social platform using Next.js, trPC, Prisma, and TypeScript, achieving end-to-end type safety from database to UI. Implemented secure authentication, real-time tweet feeds, and fully type-checked API contracts with zero runtime type errors.

EDUCATION

Bachelor of Computer Science

Alexandria University

📅 09/2020 - 06/2024 📍 Alexandria, Egypt
